SUMMARY

I am a full-time Power BI developer transitioning into freelance data science to build a more flexible career. I partner with business teams to design and optimize data visualizations that support informed decision-making.

EMPLOYMENT HISTORY

Software Data Operations Engineer, MAQ Software

Jun 2025 – Present

- Developed and maintained Power BI reports in Microsoft Fabric, applying advanced DAX logic and Python for custom visualizations
- Collaborated with clients to define project scope and deliverables, establish milestones, and communicate progress
- Wrote SQL queries to cross-check and validate report outputs against trusted data sources
- Analyzed trends in data using Power BI and Excel and presented strategic recommendations via PowerPoint
- Improved development workflows by leveraging Git integration and deployment pipelines
- Assigned and coordinated development tasks across a team of two other developers
- Contributed to UI/UX design reviews to enhance usability and visual consistency

Research Assistant, Seattle University

Sep 2024 – Jun 2025

- Simulated electrical activity in neurons using statistical inference to replicate the bursting frequencies of neurons at select amplitudes of injected current
- Analyzed output pair plots for data correlation and trends
- Wrote a report and presentation tailored to non-experts on the process we used to achieve results
- Worked remotely to develop and test code implementing neural posterior estimation using Python (matplotlib, scikit-learn, numpy, sbi) with Jupyter Notebook

Undergraduate Math Tutor, Seattle University

Sep 2023 – Jun 2025

- Tutored around 40 students per month in a variety of undergraduate math courses

SKILLS

Tools: Microsoft Power BI, Microsoft Fabric, Microsoft 365 OS (Excel, PowerPoint, Word, Outlook), GitHub and Git, Visual Studio, ArcGIS Online, Google Firebase (NOSQL database), Google Functions, ChatGPT / AI tools, R Studio

Programming Languages: SQL, Python, R, HTML, CSS, JavaScript

Concepts: Relational database design, data modeling and schema design, normalization, cybersecurity, Agile processes

Soft Skills: Technical communication, teamwork, professionalism, adaptability, problem-solving, time management, planning

Foreign Languages: Mandarin Chinese (HSK 3 Certification - Aug 2024, Confucius Institute of the State of Washington)

EDUCATION

Bachelor of Science, Mathematics and Computer Science

Sep 2021 – Jun 2025

Seattle University, Double major

PROJECTS

Microgrid Toolkit, KiloWatts for Humanity, Seattle University Capstone Project

Worked with a team of 4 developers to build a web application that models energy production for off-grid electrical systems in developing countries. Designed the system, data storage, and energy calculation scripts using Google Firebase, Google Functions, and Python. We used Visual Studio for development and GitHub for version control.

Austin Animal Center Outcomes

Developed a notebook in R Studio to analyze the outcomes for cats and dogs as they leave the Animal Center in Austin, TX, based on the characteristics of the animals. Compiled results into a PowerPoint to highlight the most vulnerable animals in the shelter.
